

Halton Panelcraft

Mild Steel • Stainless Steel • Aluminium • Enclosures • Powder Coatings • Structural Steelwork

Halton Panel Craft is a precision sheet metal fabricator specialising in manufacturing sheet metal parts from customer supplied drawings.

We supply a variety of panels, cabinets and enclosures using mild steel, stainless steel and aluminium in our production processes.

All products can be powder coated to individual customer requirements. In addition to this we supply all types of manufactured tubular products as well as structural steel work such as staircases and preformed commercial structures.

Our advanced technology enables us to provide quality products to fulfil a high variety and small to large volume orders accurately and on time to meet your needs.

No matter what field of manufacturing your company is in, you have very specific needs in terms of sheet metal fabrication. At Halton Panelcraft we have a thorough understanding of the materials, specifications and processes it takes to build quality into every part. Halton Panelcraft makes every effort to be technically superior, diverse and flexible to meet your needs precisely.

Products & Services

SHEET METAL – Custom Built

1. **MCC Enclosures ***
2. **Distribution Switchboards**
3. **Transformer Housings**
4. **Wardrobe Enclosures**
5. **Wall Mounted Enclosures**
6. **Control Desks**
7. **Stainless Steel Cabinets ***
8. **Bespoke Cabinets**
9. **Acoustic Enclosures**
10. **Chemical Dosing Steelwork**
11. **Control Fascia Panels**
12. **Alarm Boxes**
13. **Signage – Aluminium, ST/Steel & M/Steel**
14. **Modifications to 'off the shelf enclosures' e.g. door cut outs, colour changes etc.**

*Designed to IP54 & IP65
(Certified to IP54)

FINISHING

1. **Shot Blasting**
2. **Stainless Steel Polishing**
3. **Powder Coating**
4. **Wet Paint**
5. **Phosphates**
6. **Primers**
7. **Plating**
8. **Galvanising**

All sheet metal fabrications are powder coated in house with the capacity to undertake outside contracts.

STRUCTURAL STEELWORK

1. **Structural Steel Framing**
2. **Mezzanine Floors**
3. **Commercial Building Steelwork Extensions**
4. **Staircases**
5. **Platforms**
6. **Conveyor Systems**
7. **Pipework Systems**
8. **Fencing, Gates, Railings etc.**
9. **Stainless Steel Handrailing**

Halton Panelcraft was established in 1994, primarily to provide a full manufacturing service to the control panel industry. Since then we have developed a strong customer base, and have gained in reputation for both quality and competitive pricing.

We are manufacturers of custom Motor Control Centres, Wardrobe Enclosures, and Control Desks. A move to new 7,000 square foot premises in July 1998 allowed us to expand into powder coating and wet painting which has had a positive impact on our costs and delivery periods.

In February 2000 we increased our floor area by a further 7,000 square feet to enable us to expand our sheet metal work, fabrication and powder coating, and to allow space to include structural steelwork within our product range.

All of our practices conform to ISO 9001

Since starting Halton Panelcraft in 1994 we have developed a strong client base that includes such companies as:-

- SHELL UK
- THE WATER INDUSTRY
- THE FOOD INDUSTRY
- KEMIRA AGRO UK
- BNFL
- BICC
- AIR PRODUCTS
- SIEMENS

This has allowed us to gain our reputation for both quality and competitive pricing.
